ARDUBOY

You helped make this!

THANK YOU!

A WILD ARDUBOY APPEARS!!
ARDUBOY USED KICKSTARTER!
IT WAS SUPER EFFECTIVE!
YOU HAVE BEEN CHALLENGED!
WHAT WILL YOU CREATE?

# "HOW TO START PLAYING WITH ARDUBOY"

## WHAT YOU'LL NEED:

01. Arduboy Game System
02. Micro-USB Cable
03. Computer (Win/Mac/Linux)
04. The Internet

---

### Step 1:
### SWITCH POWER ON

The power switch is located on the top edge of the upper left of the Arduboy. Toggle the switch to the right to begin playing. Turn it off when you're done!

---

### Step 2:
### INSERT USB CABLE

Plug a micro-usb cable in to the port at the bottom of the Arduboy. A red light means charging and yellow indicates an active data connection.

---

### Step 3:
### DOWNLOAD & UPLOAD

Visit ARDUBOY.COM and use the quick start guide to install all the software you will need.

Download new free games from the community page and follow tutorials to learn more!
